

MEDINA

Pedal operated medical bin

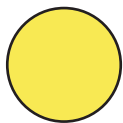

The MEDINA is a 50 litre pedal operated bin designed for medical waste disposal.

The unit has a large waste holding capacity while remaining compact, modern and attractive in design. It is pedal operated to ensure maximum hygiene and a modesty flap ensures waste is not visible to the end user while the unit's large centrally positioned aperture makes waste disposal easy.

The MEDINA incorporates a patent applied removable hygienic bin to aid serviceability. The hygienic bin protects the inside of the unit from soiling and can be removed for easy cleaning.

Finishes available

Yellow
